MARIA BLANCO
Front-End Developer

PROJECTS

Collapsing Margins
Responsive web developed with HMTL5,CSS3,Flexbox,Grid, Sass and Git like a version control system.

Rick and Morty, a web browser.
Responsive web developed with React Js, CSS3 and Sass .I access the data through API REST and I work with GIT.

TV show finder
I access the data through API REST and I use Javascript,HTML5, CSS3 and Sass.

Legacy Code
We started from Javasripts legacy code.The code has been refactored and old code has been removed and we used React JS to redo the whole project and make it reusable. We have also introduced improvements for the user such us dark mode.

ABOUT ME

Passionate about new technologies and how the digital transformation is changing the world.
My background as a Technology & Merchandising Pro at Apple company has allowed me to focus on technical **problem solving**, being **flexible** in enviroments of constant change ,with a high degree of **dedication** to each project.
Brave to embark on new challenges, this time to reinvent my career as a **Front-End Developer**, bringing together my enthusiasm for design with the ability to be in continuous learning.
